Personal Details

- **Father's Name:** Noor Habib Shah
- **Date of Birth:** 18 March 1992
- **Nationality:** Pakistani
- **Marital Status:** Married
- **Visa Status:** Valid Employee Visa (UAE)
- **Driving License:** Valid UAE Driving License
- **License No:** 2718220
- **License Expiry:** 18 October 2026
- **Passport Number:** BJ6033172
- **Passport Expiry:** 12 September 2032

Education

Diploma of Associate Engineer (Electrical)

- Board of KPBTE, Peshawar – Pakistan
- 2011

Certifications

- **IOSH Certification, Technocrats Institute of Occupational Safety and Health** – 2017
- **Electrical Supervisor Certification, K.P.K Trade Testing Board** – 2008

Skills

Electrical System Installation & Maintenance

- Skilled in installing, maintaining, and troubleshooting electrical components including MDBs, SMDBs, ACBs, capacitor banks, and control panels.

Power Distribution & Load Management

- Proficient in estimating electrical loads, setting up distribution panels, and ensuring stable power supply in industrial and commercial settings.

About Me

Dynamic and results-driven Electrical Maintenance Technician and Foreman with over 11 years of hands-on experience in commercial and industrial electrical systems, specializing in installation, testing, maintenance, and troubleshooting. Demonstrated expertise in managing MDBs, SMDBs, capacitor banks, ACBs, and booster/transfer pump systems. Proven ability to supervise teams, ensure compliance with international standards, and optimize electrical performance across multi-site projects. Recognized for a strong work ethic, technical precision, and commitment to safety. Adept at vehicle handling and logistics to support project efficiency.

Work Experience

Electrical Supervisor

Galvacoat Industries LLC, Abu Dhabi, UAE

2019 – Present

- Conduct preventive maintenance and functionality testing for generators, ACBs, MDBs, capacitor banks, and SMDs.
- Install and commission lighting systems and electrical switch panels for industrial facilities.
- Execute emergency repairs and resolve critical electrical faults with minimal downtime.
- Connect and maintain booster and transfer pumps, ensuring stable water supply operations.
- Ensure systematic cable management and safety compliance in distribution fuse boards.
- Operate company vehicles to transport tools, materials, and components to job sites.
- Assist with load estimation for electrical design planning in lighting and power distribution.

Electrical Foreman

Ohm Electromechanical LLC, Sharjah, UAE

4 Years

- Led the installation and termination of power distribution panels including MDBs and SMDBs.
- Oversaw testing and implementation of protection devices like MCBs, MCCBs, ELCBs, and RCCBs.
- Coordinated site activities to align with design layouts, project specs, and safety protocols.
- Facilitated on-site logistics, including transport of personnel, tools, and equipment.
- Maintained accurate documentation of site reports, inspections, and daily progress.
- Troubleshooted electrical issues in real-time to ensure uninterrupted site operations.
- Trained junior staff in electrical safety protocols and safe driving practices.

Electrical Foreman

Al Nukhbah Electromechanical LLC, Dubai, UAE

3 Years

- Supervised end-to-end installation and commissioning of electrical power systems.
- Ensured strict adherence to international codes and project specifications.
- Managed transportation of electrical materials and work crews to multiple job sites.

Preventive & Emergency Maintenance

- Experienced in performing routine checks and emergency repairs to reduce downtime and maintain system reliability.

Safety Compliance & Risk Management

- Knowledgeable in electrical safety standards and certified in IOSH; consistently ensures safe work environments and practices.

Team Leadership & Site Supervision

- Demonstrated ability to lead teams, coordinate site activities, and train junior technicians in both electrical tasks and operational safety.

Cable Management & Wiring Schematics

- Well-versed in organizing and labeling wiring systems for clean installations and efficient troubleshooting.

Technical Diagnostics & Problem Solving

- Strong analytical skills for identifying faults and implementing efficient, lasting solutions.

Equipment Handling & Logistics Coordination

- Experienced in transporting tools, electrical materials, and crew to job sites; ensures timely project execution.

AutoCAD & Technical Documentation

- Familiar with AutoCAD 2D for reviewing and interpreting electrical diagrams; skilled in preparing daily reports and inspection logs.

Computer Skills

- AutoCAD 2D (Electrical Drafting)
- MS Office Suite (Word, Excel, PowerPoint)
- Windows OS & Internet Tools
- Hardware & Software Installation

Languages

- English
- Urdu
- Hindi
- Arabic
- Pushto

- Submitted daily site reports, including inspection requests and work assessments.
- Collaborated with multi-disciplinary teams to streamline project execution.
- Installed and tested protection devices with a high level of accuracy.
- Performed routine vehicle inspections and scheduled maintenance for operational reliability.

Key Responsibilities

- Installed and commissioned electrical distribution systems including MDBs, SMDBs, lighting panels, and capacitor banks for commercial and industrial projects.
- Performed routine and preventive maintenance on electrical components such as generators, switchgear, and pump control systems to ensure optimal performance.
- Diagnosed and repaired complex electrical faults and equipment malfunctions under emergency and time-critical conditions.
- Supervised site teams and coordinated with project managers and engineers to align electrical work with project specifications and safety standards.
- Conducted testing and calibration of circuit breakers (MCBs, MCCBs, ELCBs, RCCBs) to ensure protection systems function correctly.
- Managed electrical logistics, including transport and delivery of tools, components, and personnel to multiple job sites across regions.
- Prepared and maintained detailed technical reports, inspection checklists, and daily progress logs for client and regulatory compliance.
- Ensured proper cable routing and termination, implementing organized cable management practices to meet safety and operational standards.
- Estimated power and lighting loads, contributing to planning and procurement decisions during early project stages.
- Trained junior electricians on safety protocols, equipment handling, and efficient work procedures, enhancing overall team productivity.

Declaration

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief. I am committed to performing my duties with sincerity, professionalism, and integrity.
